PROFESSIONAL SUMMARY

Software Engineer with experience building full-stack, backend, mobile, and AI-powered applications using Java, Python, TypeScript, React, Node.js, Firebase, and SQL. Experienced developing REST APIs, cloud-based applications, Android apps, and evaluating frontier AI models on software engineering tasks. Strong foundation in object-oriented programming, algorithms, data structures, networking, operating systems, and performance optimization.

TECHNICAL SKILLS

Languages: Java | Python | C++ | C | Kotlin | TypeScript | JavaScript | SQL

Frontend: React | Next.js | HTML | CSS

Backend: Node.js | Express.js | REST APIs

Databases: MongoDB | Firebase | Azure MySQL | SQLite

Tools & Platforms: AWS | Git | Linux | Unix | Postman | Maven | Gradle | Android Studio | VS Code

WORK EXPERIENCE

AI Model Evaluator — Handshake AI (*Remote*) January 2026 – Present

- Evaluated frontier LLMs on software engineering and multimodal reasoning tasks using structured evaluation rubrics.
- Identified failure modes in AI-generated image outputs, providing feedback to improve multimodal model quality.
- Maintained high calibration standards while producing human feedback data for frontier AI coding models.

Software Engineering Intern — SkyIT Services (*Remote*) May 2024 – August 2024

- Developed and validated backend services using **Node.js** and **Azure MySQL**, improving query speed by ~40%.
- Built and tested **RESTful APIs**, improving correctness, reliability, and performance under load.
- Debugged application and database issues to improve backend reliability and stability.
- Validated backend functionality across 20+ release cycles to identify defects before deployment.

Resident Assistant — University of Georgia Housing (*Athens, GA*) August 2024 – May 2025

- Managed a community of 30+ residents, coordinating 10+ events while ensuring safety and resolving conflicts.

Shift Manager — Marble Slab Creamery Inc. (*Stafford, TX*) September 2022 – July 2023

- Trained and supervised 3 new employees while managing daily operations and \$3K+ cash workflows.
- Improved order processing efficiency by 25% through workflow optimization and team coordination.

PROJECTS

Personalized Fitness and Nutrition Partner — *NutriTwin* June 2026

- Developed a **React Native** app with **Firebase** and Google Fit/Apple Health APIs for real-time health data synchronization.
- Integrated Gemini AI to generate personalized mood, energy, and nutrition recommendations.
- Integrated Firebase Authentication and Firestore to enable secure user accounts and real-time synchronization.
- Designed an intuitive React Native UI for meal tracking, pantry-based recipes, and personalized fitness insights.

Campus Job Board with AI Integration — *Campus Dwellers* April 2025

- Developed a full-stack job board using **Next.js**, **Node.js**, and **MongoDB** with a responsive React interface.
- Implemented **JWT** authentication and protected API routes for user management.
- Integrated resume parsing and automated job aggregation using **Cheerio** and **Axios** to improve candidate matching.

Online Bookstore System — *The Gilded Page* July 2025

- Developed a **full-stack** eCommerce platform using **Firebase** and **JavaScript** with secure authentication.
- Designed admin dashboards with real-time inventory and order management.
- Automated promotional campaigns, inventory, and email workflows across the platform.
- Integrated **EmailJS** for automated order confirmations and customer notifications.

Android Carpool App — *UGA RideShare* May 2025

- Developed an **Android** ridesharing application in **Java** using Firebase Authentication, **Firestore**, and **SQLite**.
- Designed secure login and role-based access control for drivers and passengers.
- Implemented ride requests, real-time trip updates, and location-based ride coordination for university commuters.

EDUCATION

Bachelor of Science in Computer Science

University of Georgia, Franklin College of Arts and Sciences

GPA: 3.68/4.00 • **Dean's List:** Fall '23, Spring/Summer '24 & Spring '25 • **Presidential Scholar:** Summer '25

Relevant Coursework: Data Structures, Algorithms, Networking, Computer Architecture, Systems Programming, Mobile Development, Web Development, Software Development
